

We are your Patient-Centered Medical Home

Tallahassee Pediatrics has been recognized as a Patient-Centered Medical Home (PCMH) since 2017. As a PCMH, we use evidence based care to provide a comprehensive, whole person, patient centered care. Our practice sees patients from birth thru age 20 providing same day or urgent visits, routine follow-up appointments, preventative care services and behavior management.

What is a Patient-Centered Medical Home or PCMH?

A Patient Centered Medical Home is a practice that puts the patient at the center of all decisions. Providing care that is respectful of and responsive to individual patient preferences, needs, and values, and ensuring that patient values guide all clinical decisions.

Our Services Include:

- Well child visits
- Sick/acute care
- Immunizations
- Sports physicals
- School physicals

Our practice has a variety of education tools and self-management tools that you can use to better understand and manage your child's care. If you are interested in accessing any of these documents, please contact our office.

How can I assist my child's healthcare team?

- Provide your doctor with a complete history of recent medical conditions, care provided by other doctors and a list of newly prescribed over-the-counter treatments and medications
- Follow your provider's recommendations for scheduling and keeping your appointments and completing any ordered tests, consultations or treatments
